

Agency LOCAL SEO + AI Search (AEO, GEO)

339K Impressions, 30 Pages in ChatGPT

A full-service digital agency in Queensland, Australia was invisible in their own search results despite doing excellent work for clients. The site was technically functional but not built to rank or to be cited by AI systems. I fixed both simultaneously: website updates, full technical and on-page SEO, content strategy, schema markup, and complete AI search optimization.

Results over 16 months: 1,820 organic clicks. 339,000 GSC impressions. 1,300 organic keywords ranking (+25%). 30 pages now cited in ChatGPT. 45 total AI citations across ChatGPT, AI Overviews, and Gemini. Clear compounding growth curve from early 2026 with no reversals. Ongoing engagement.
